Key Observations

- Story health - Medium
- 4 acceptance criteria, 0 adequately covered, 3 with gaps, 1 not covered.
- 41 tests and 15 mapped.
- 4 bugs, with 1 open.
- Criteria with gaps: AC-01, AC-02, AC-03, AC-04.
- Bug 122590 is closed and does not set health.
- Open bug 122594 (P3) remains: Sign in screen has UI issue.
- Bug 122595 is closed and does not set health.
- Bug 122592 is closed and does not set health.
- No tests in this suite check the successful login flow with valid credentials and redirection to the SNAP dashboard; only validation error scenarios are covered.
- No tests in this suite check the successful login behavior or redirection to the SNAP dashboard; all listed tests focus on password recovery and session management.
- Test 121221 checks the error message for an unregistered email and that the user stays on the login page, but it does not verify the behavior for a registered email with a wrong password.
- No tests in this suite check the specific behavior of invalid credentials (unregistered email or wrong password) causing an error message and staying on the login page.
- Tests 121224, 123364, and 123378 verify that clicking Show displays the password as plain text, though test 123364 covers an edge case with an empty field.
- Test 123402 verifies that clicking Show displays the password as plain text before navigating to the recovery page, which is the only test addressing this behavior.
- Test 121228 verifies the 'Forgot Password?' link click and page redirection but does not confirm the specific destination URL or recovery page content.
- The named tests verify that clicking the Forgot Password link redirects to the password recovery page under various conditions including empty credentials, invalid credentials, keyboard activation, and direct URL access, while missing specific validation for successful login credentials.

3. Acceptance Criteria vs Test Case Coverage

Coverage depth shows which scenario types (Positive, Negative, Adhoc) are covered by test cases for each acceptance criterion; coverage gap shows what is missing. The cells are the score's depth and gap.

Gap colour key:

Adequate | Partial / missing scenarios | No coverage at all

123086 - SNAP Login Screen - Admin

4 acceptance criteria | 0 adequately covered | 3 with gaps | 1 not covered

AC ID	Coverage Depth (AI)	Coverage Gap (AI)
AC-01	None	No coverage AC quality: good
AC-02		1.No Positive scenarios Covered 2.No Negative scenarios Covered 3.No Adhoc scenarios Covered AC quality: good
